## PROJECTS

### FILMFOLIO (FEB 2025)

#### *Movie & TV Show Information App (React)*

[Github Repo](#)

- Developed a dynamic React app fetching 1000+ movies, TV shows, and actor details using an external API.
- Implemented infinite scroll and horizontal card sections, improving browsing experience for 30+ trending items per view.
- Added filtering by 5+ categories and duration with an intuitive, responsive UI.
- Created detailed views featuring trailers, actor information, and related content - increasing info depth by 2x per item.
- Optimized API usage by minimizing redundant requests and conditionally fetching data to improve performance.

### AVIANTA (MARCH 2025-PRESENT)

#### *Aeroplane Booking System (ongoing | Node.js & Express)*

[Github repo](#)

- Developed a clean and modular backend using Node.js and Express, focused on scalability and maintainability.
- Built RESTful APIs using Node.js and Express to handle core backend logic for flight search and booking functionality for 99% reliability
- Integrated comprehensive error handling and input validation to ensure smooth API responses and prevent crashes.
- Used Postman for testing API endpoints and handling request validation and error responses.
